

A more productive way to access
the Ethereum Opportunity

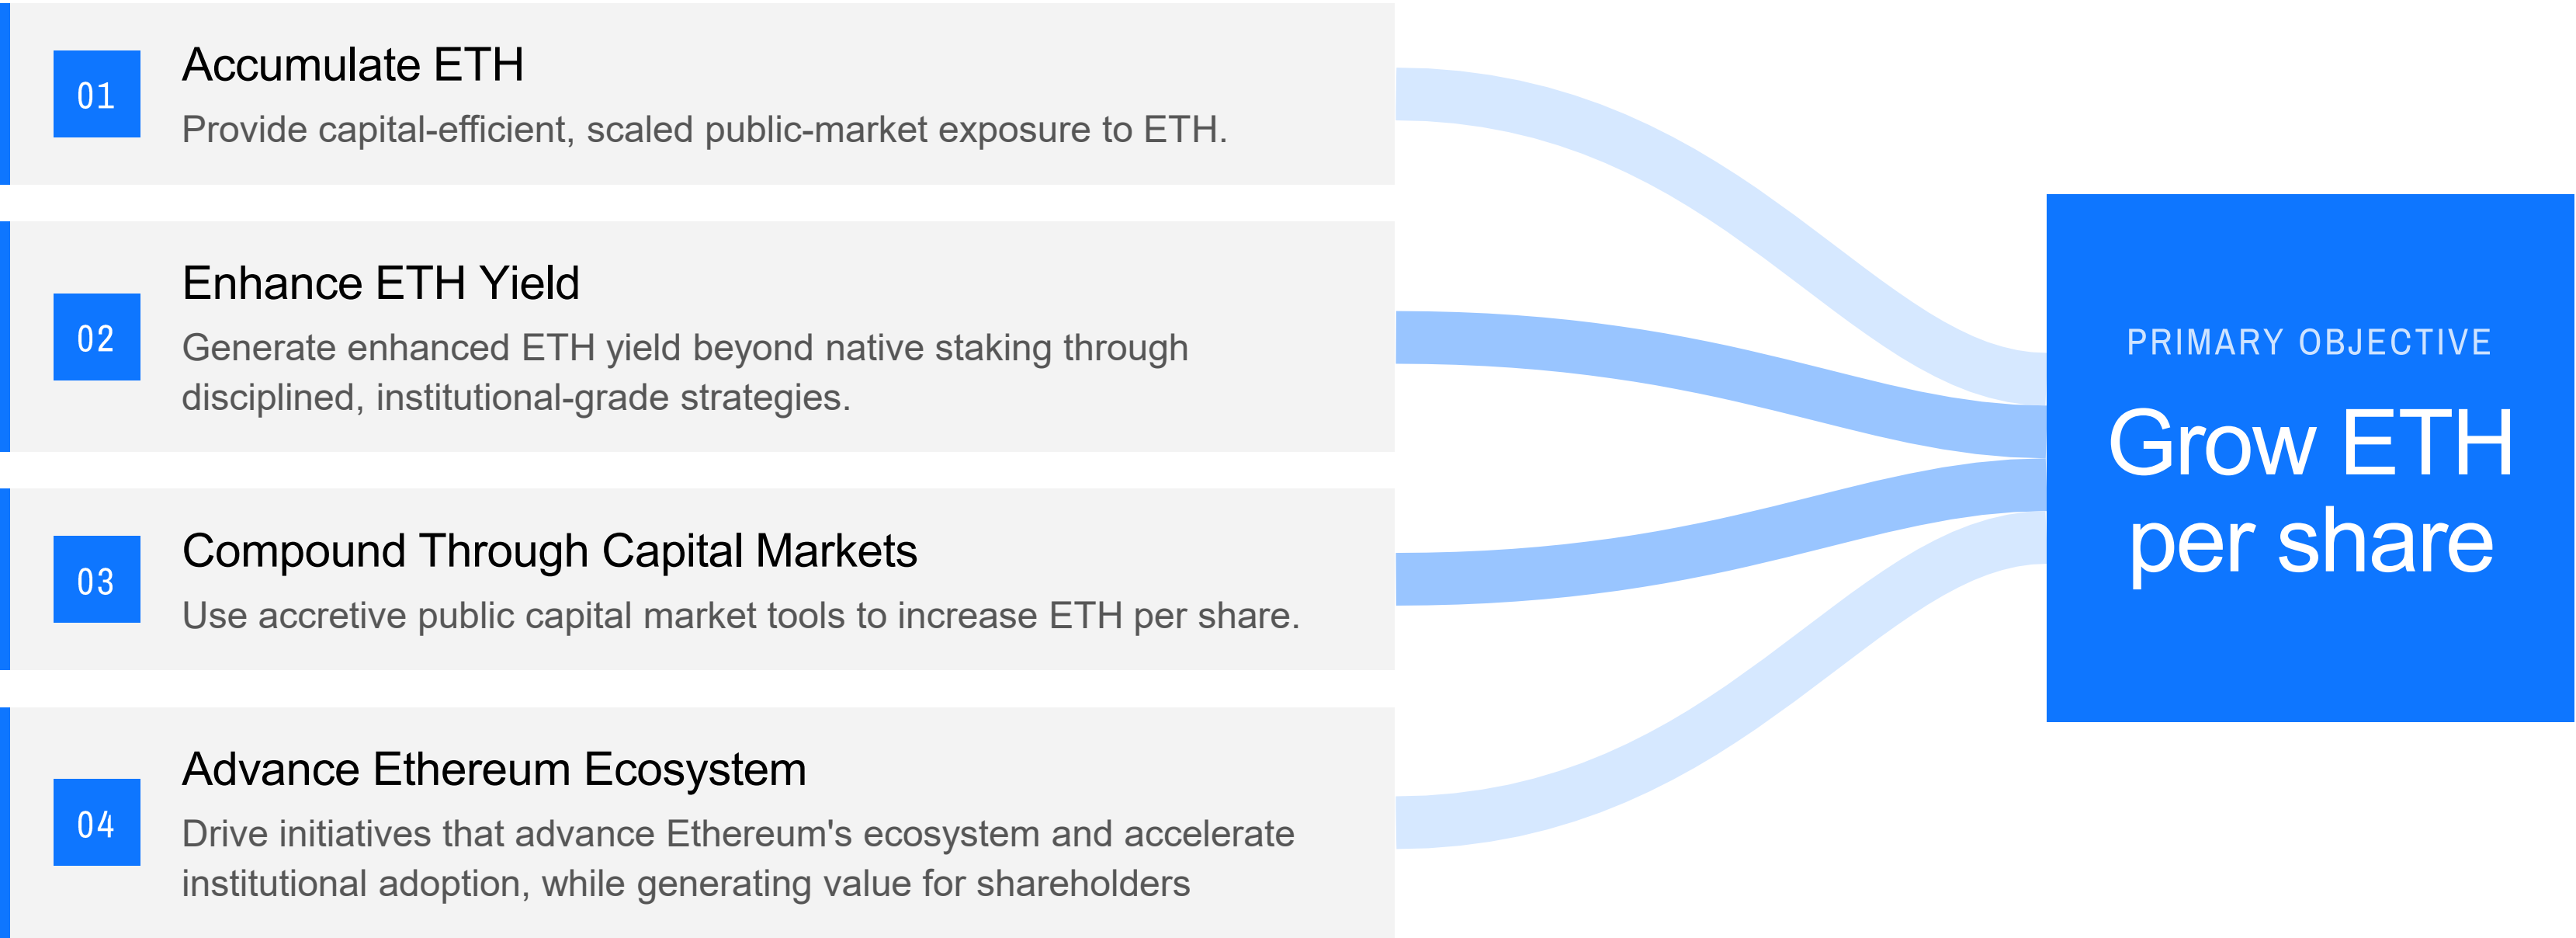

NASDAQ: SBET ▪ INVESTOR PRESENTATION ▪ SEPTEMBER 2026

Superior Ethereum Exposure

Sharplink combines scaled ETH ownership, productive yield generation, disciplined capital-markets execution and active ecosystem leadership.

FOUR INPUTS

The Differentiated ETH Treasury Platform

SCALE & COMPOUNDING

01

Top ETH Treasury

888,000+ ETH, and the highest institutional ownership among peers.

02

Engineered to Compound

Increased ETH per share +100% since launch.

03

Pioneering Productivity

~100% of ETH staked and deployed since launch in June 2025, generating >27,000 ETH in rewards.

STRUCTURAL ADVANTAGES

04

Public-Market Advantage

Permanent capital and accretive capital-markets tools on a largely fixed-cost platform.

05

Ethereum-Native, Institutional Leadership

Chaired by Ethereum co-founder Joe Lubin; led by the architect of BlackRock's digital asset strategy.

06

Strategic Partnership with Consensys

Distinctive access to Ethereum expertise, infrastructure and ecosystem relationships.

Data as of September 25, 2026

Built by Proven Pioneers

Leadership spanning the creation of Ethereum and the institutional adoption of digital assets.

Joe Lubin

JOE LUBIN, CHAIRMAN

Co-Founded Ethereum

- Helped design and launch the world's leading smart contract blockchain

Founded Consensys

- Global Ethereum company spanning software, infrastructure and ecosystem investment

Advancing Ethereum Adoption

- MetaMask, Infura and Linea connect millions of users and developers to Ethereum
- Consensys has published more EIPs than any organization other than the Ethereum Foundation

JOSEPH CHALOM, CEO

Built and Led BlackRock's Digital Asset Strategy

- Drove the firm's strategy across digital assets, tokenization and blockchain infrastructure

Launched Landmark Digital Asset Products

- IBIT: Fastest ETP to reach \$100B
- ETHA: Largest U.S. spot Ether ETP
- BUIDL: One of the largest tokenized funds

Scaled Aladdin into a Global Platform

- Helped expand BlackRock's investment and risk-management platform globally, supporting tens of trillions of dollars in assets

COVERED BY:

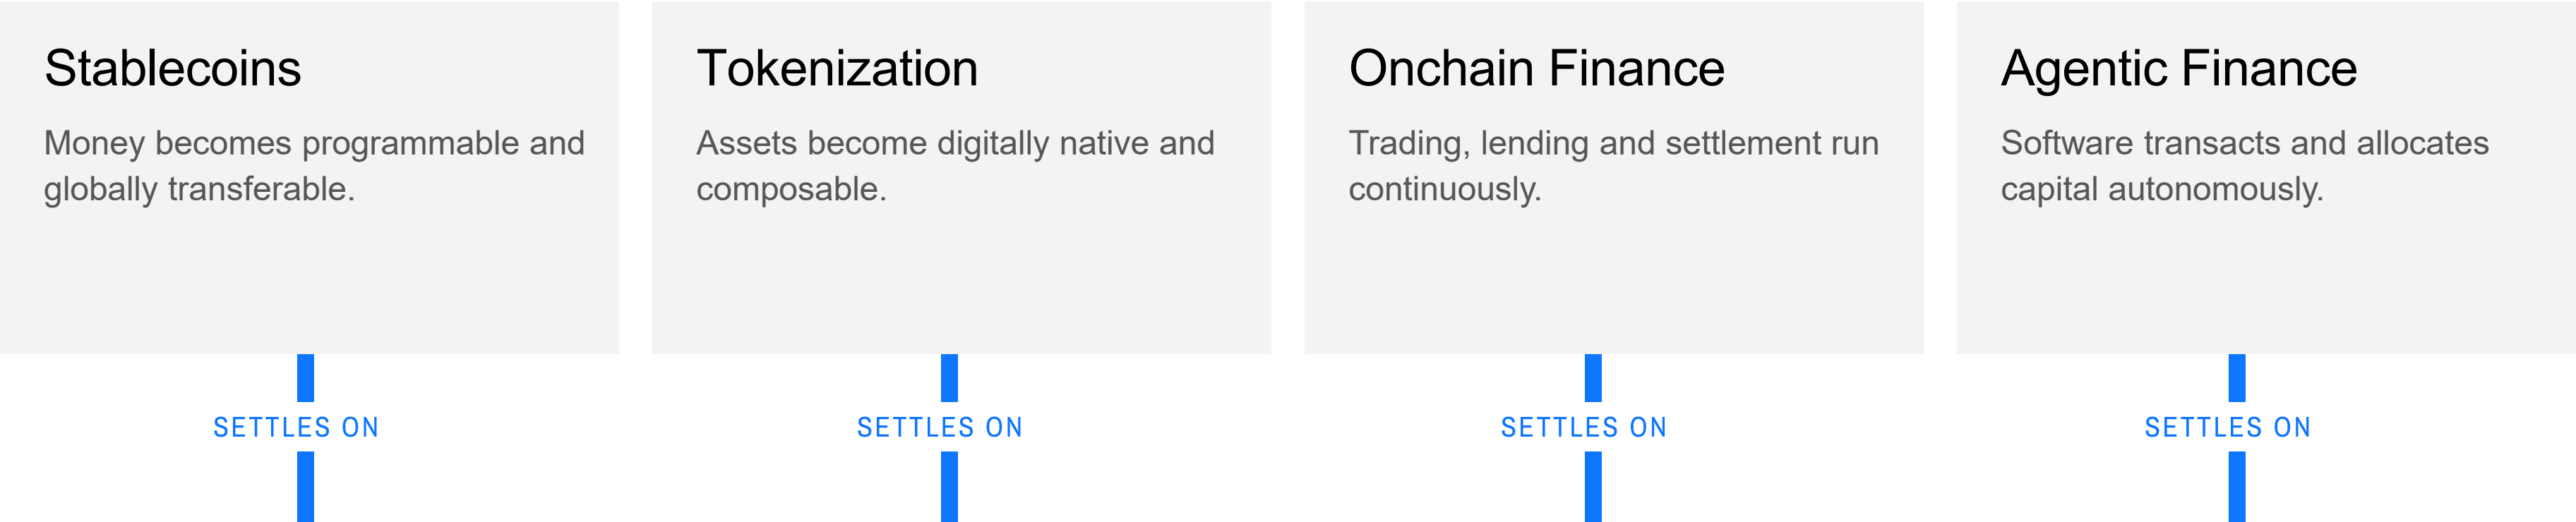

Capitalizing on the Ethereum Opportunity

The Future of Capital Markets **Runs on Ethereum**

Stablecoins, tokenized assets, onchain markets and AI agents are converging on Ethereum, with U.S. regulatory clarity accelerating institutional adoption.

Ethereum

The most liquid, secure, programmable and trusted settlement layer in the world.

Ethereum Is Winning Every Category

THE ONCHAIN ECONOMY

Ethereum leads every pillar of the onchain economy, by multiples.

The lead is self-reinforcing: liquidity begets liquidity.

STABLECOINS

57% of global stablecoin supply sits on Ethereum and its major L2s.

Digital dollars settle here.

TOKENIZED ASSETS

50% of distributed tokenized RWA value.

Real-world assets issue here.

ONCHAIN FINANCE

8.4x the DeFi TVL of the next-largest chain.

Liquidity lives here.

AGENTIC FINANCE

75.4M x402 transactions in the last 30 days.

Machine payments scale here.

RWA.xyz, DeFiLlama, x402.org and Chainalysis. Stablecoin ecosystem includes Ethereum L1, Base, Arbitrum, Optimism and zkSync. RWA and stablecoin data as of June 26, 2026; DeFi and x402 data refreshed as of July 2026.

Every Pillar Accelerates From Here

These categories are poised for exponential growth – with Ethereum expected to be the winner.

PILLAR	TODAY	NEXT LEG · ESTIMATED BY 2030	
Stablecoins	\$300B+ supply today	→	\$2T+
Tokenized Assets	\$25B onchain today	→	\$4–16T
Onchain Finance	\$73B Global DeFi TVL	→	\$2T+ as tokenized assets become productive
Agentic Finance	75M+ x402 payments / 30 days	→	\$15T

ETH Is the Commodity Powering the Onchain Economy

Historically, ETH's market value has shown a strong relationship with the value of high-quality liquid assets (“HQLA”) secured by Ethereum.

FEES

Every transaction and smart-contract interaction on Ethereum pays network fees in ETH.

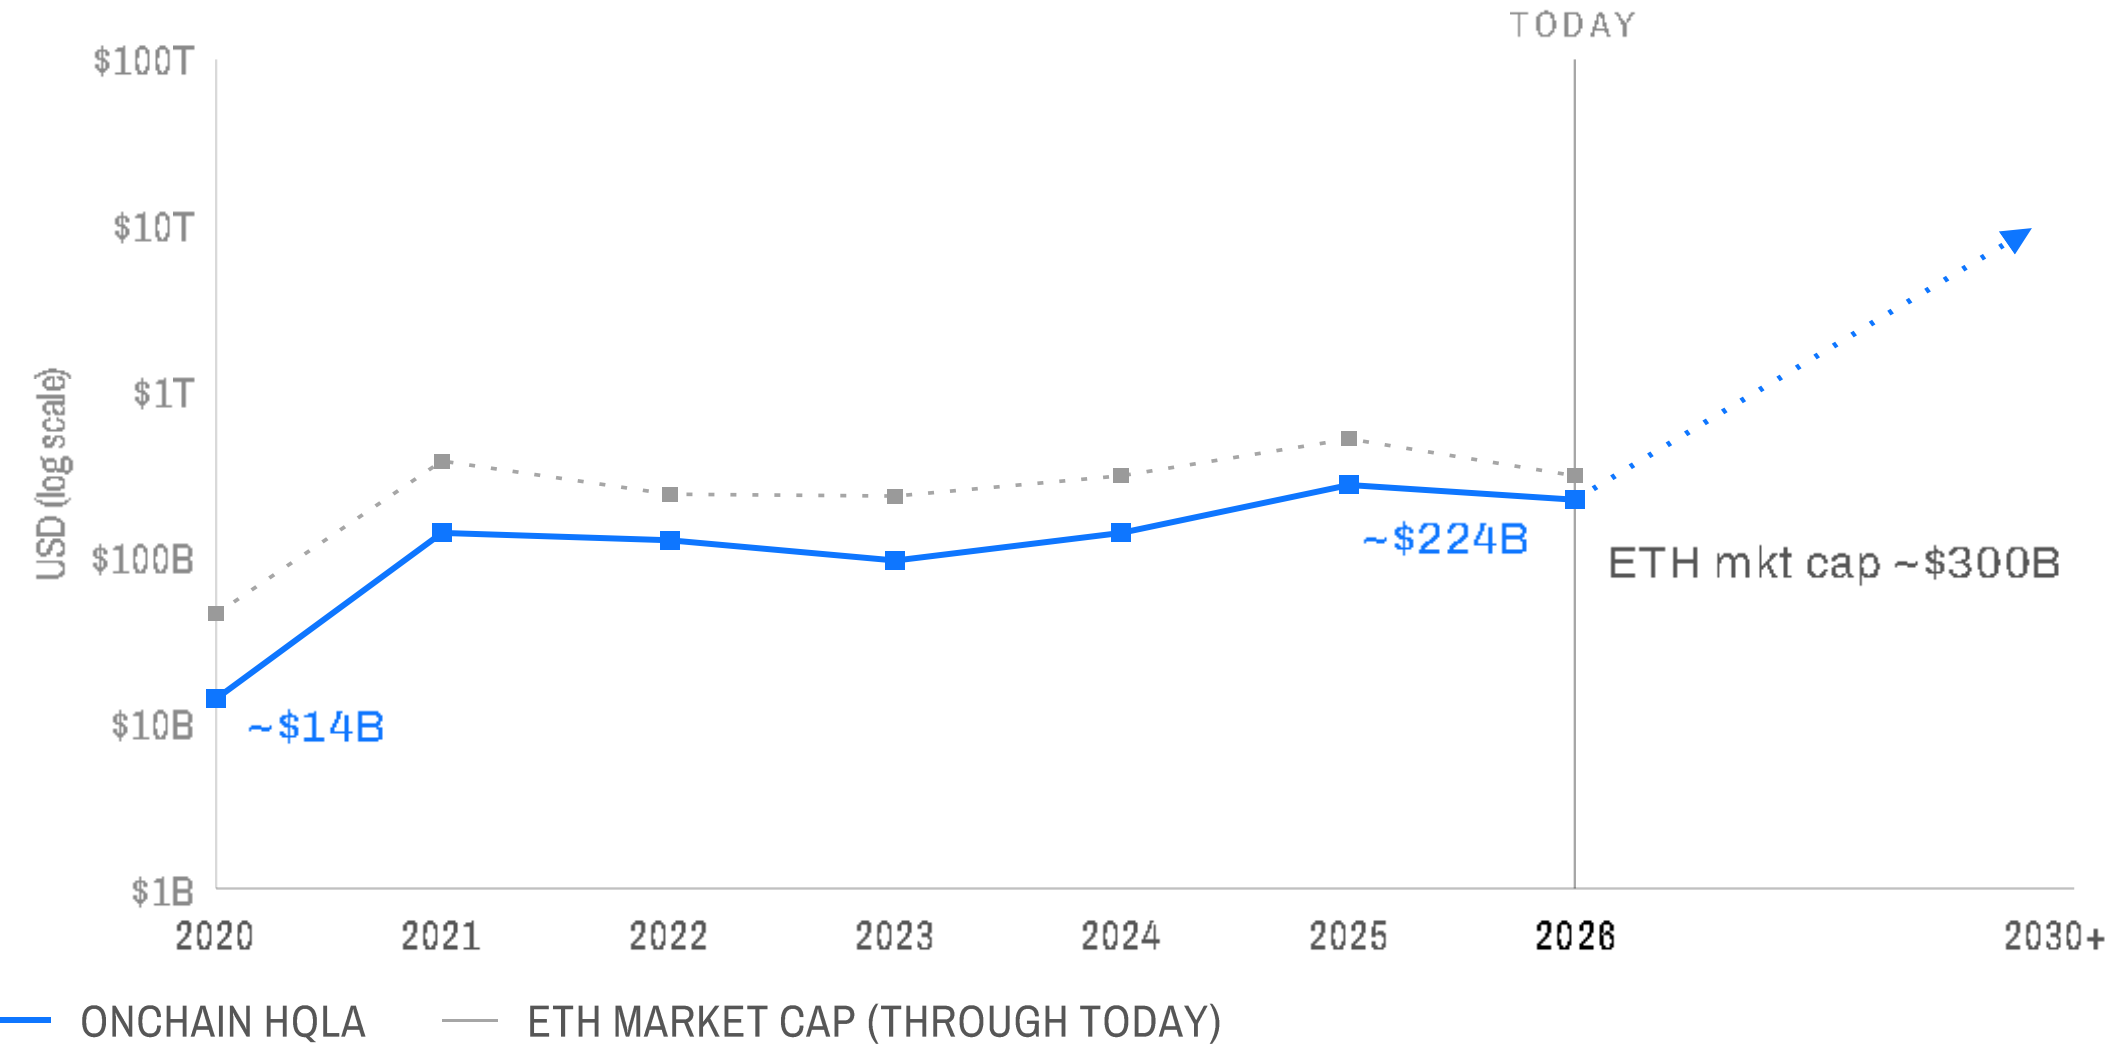

SECURITY

Staked ETH provides the economic collateral securing the network and the assets it settles.

MONEY

ETH serves as a store of value, medium of exchange and reserve collateral across the onchain economy.

ONCHAIN HQLA VS ETH MARKET CAP, 2020–2030+ (LOG SCALE)

Onchain HQLA = stablecoins + DeFi TVL + tokenized RWAs across Ethereum L1 and its rollup L2s (Polygon PoS excluded). Values on Aug 11 each year. ETH market cap is point-in-time and is shown through today (2026) only; the dotted blue line beyond 2026 is an illustrative HQLA trajectory, not a forecast. Sources: DeFiLlama (stablecoins, DeFi TVL), rwa.xyz (RWAs), CoinMarketCap (ETH market cap). Framework: Consensys, *The Industrialization of Trust*.

The World's Largest Institutions are Building on Ethereum

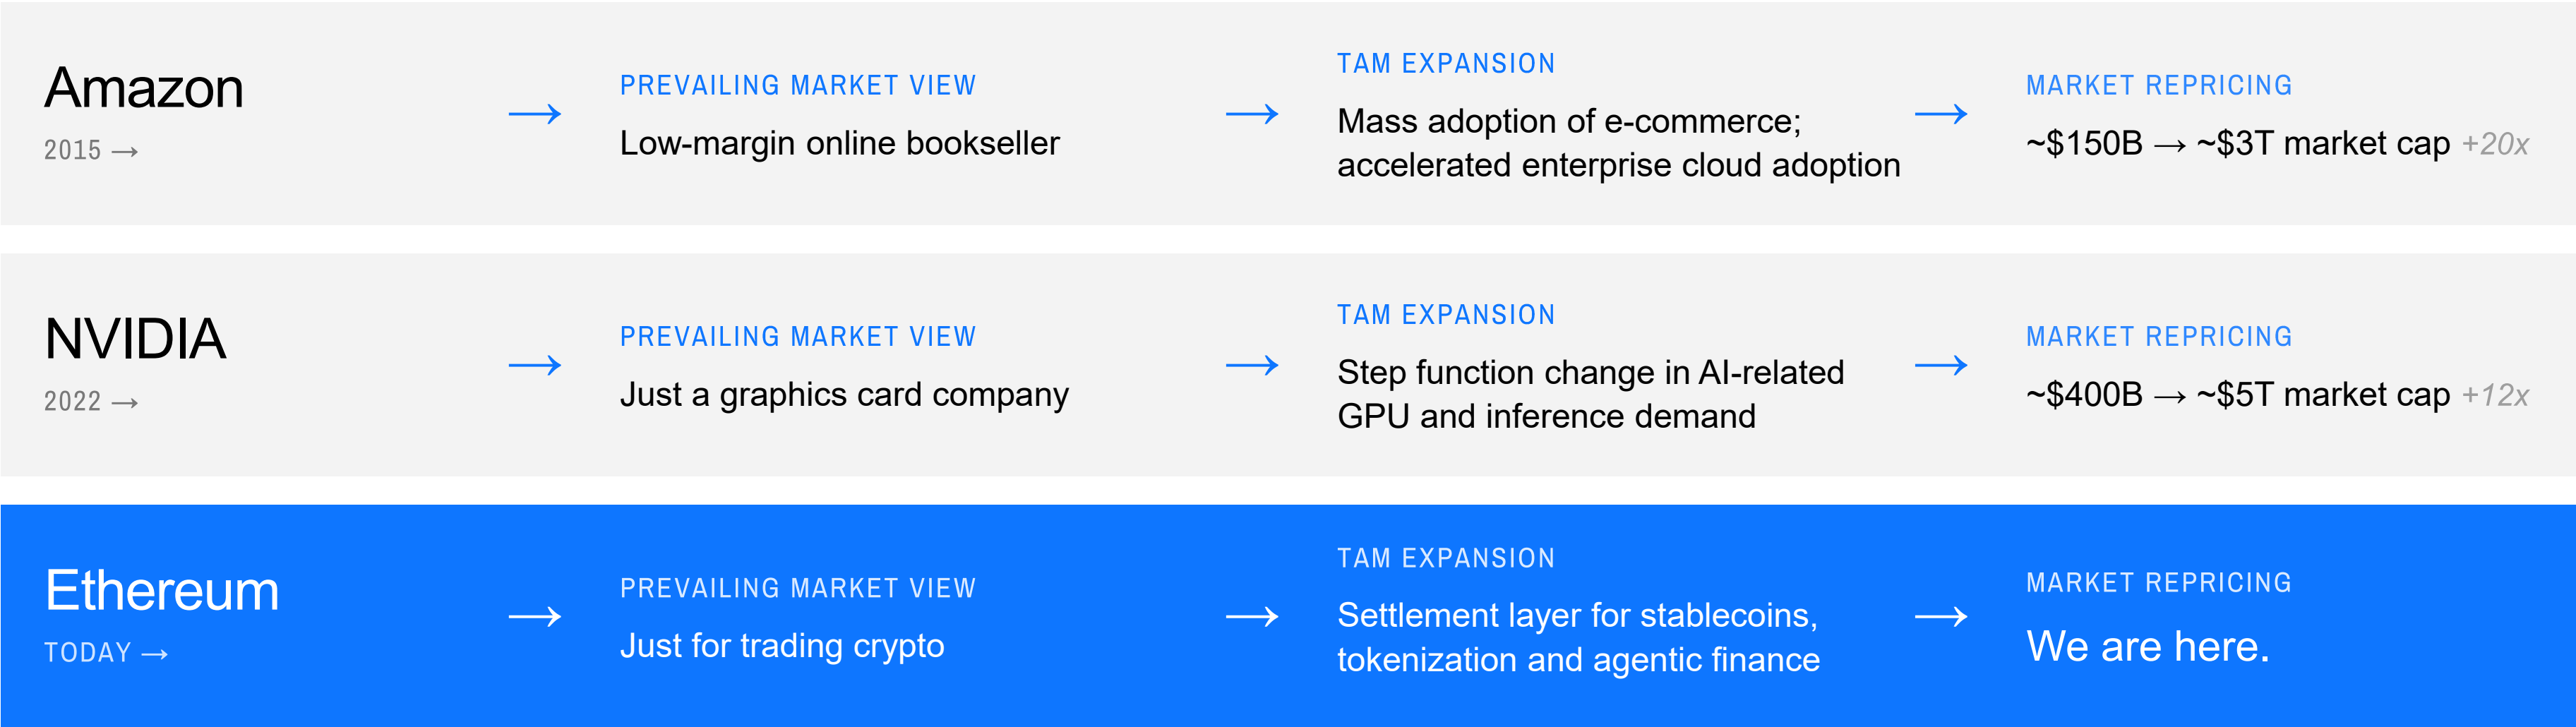

Across regions, institutions are using Ethereum for tokenization, payments, settlement, infrastructure and regulated market access.

ASSET MANAGERS	GLOBAL BANKS	APAC FINANCE	PAYMENTS & MARKET INFRA	EXCHANGES & DISTRIBUTION	TECH & TOKENIZATION
 BlackRock	J.P.Morgan	 DBS	 CIRCLE	 coinbase	 SECURITIZE
 Fidelity	 UBS	 ANZ	 PayPal	 Robinhood	 BNY
 FRANKLIN TEMPLETON	 SOCIETE GENERALE	 SBI	 VISA	 eToro	 SONY
 WISDOMTREE	 standard chartered	 DAIWA SECURITIES		 UPbit	 SAMSUNG
 VanEck	 Deutsche Bank	 NOMURA	 Swift	 HashKey	 EY Shape the future with confidence
 Baillie Gifford	 Morgan Stanley	 ANT GROUP	 DTCC	 OSL	 consensys

Representative, not exhaustive. Logos indicate active Ethereum/EVM deployments, tokenized products, settlement/infrastructure, or regulated ETH access/distribution.

When the Addressable Market Expands, Valuations Multiply

Markets initially value assets against their existing markets until the scale of the opportunity becomes clear.

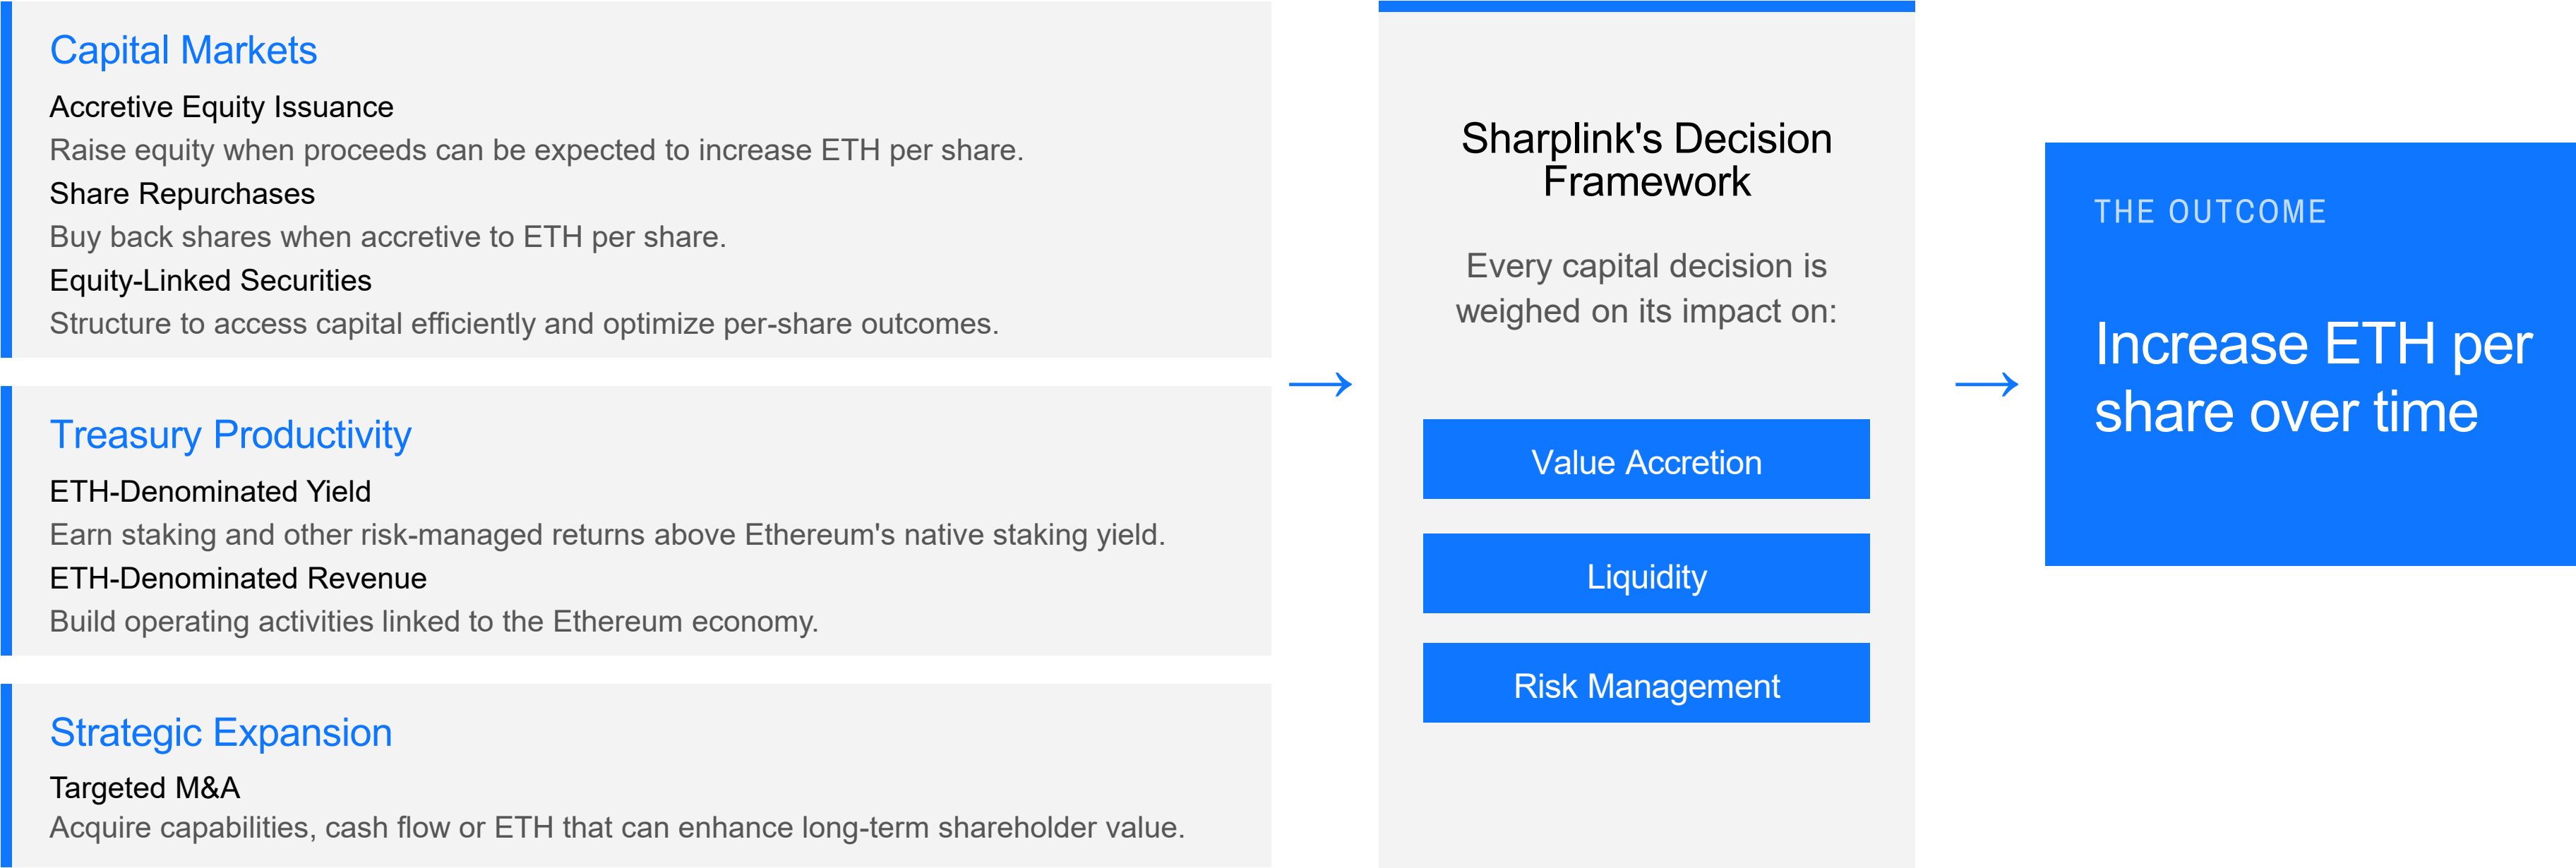

Sharplink Delivers Ethereum with an Edge

Active Treasury Management Enhances Value

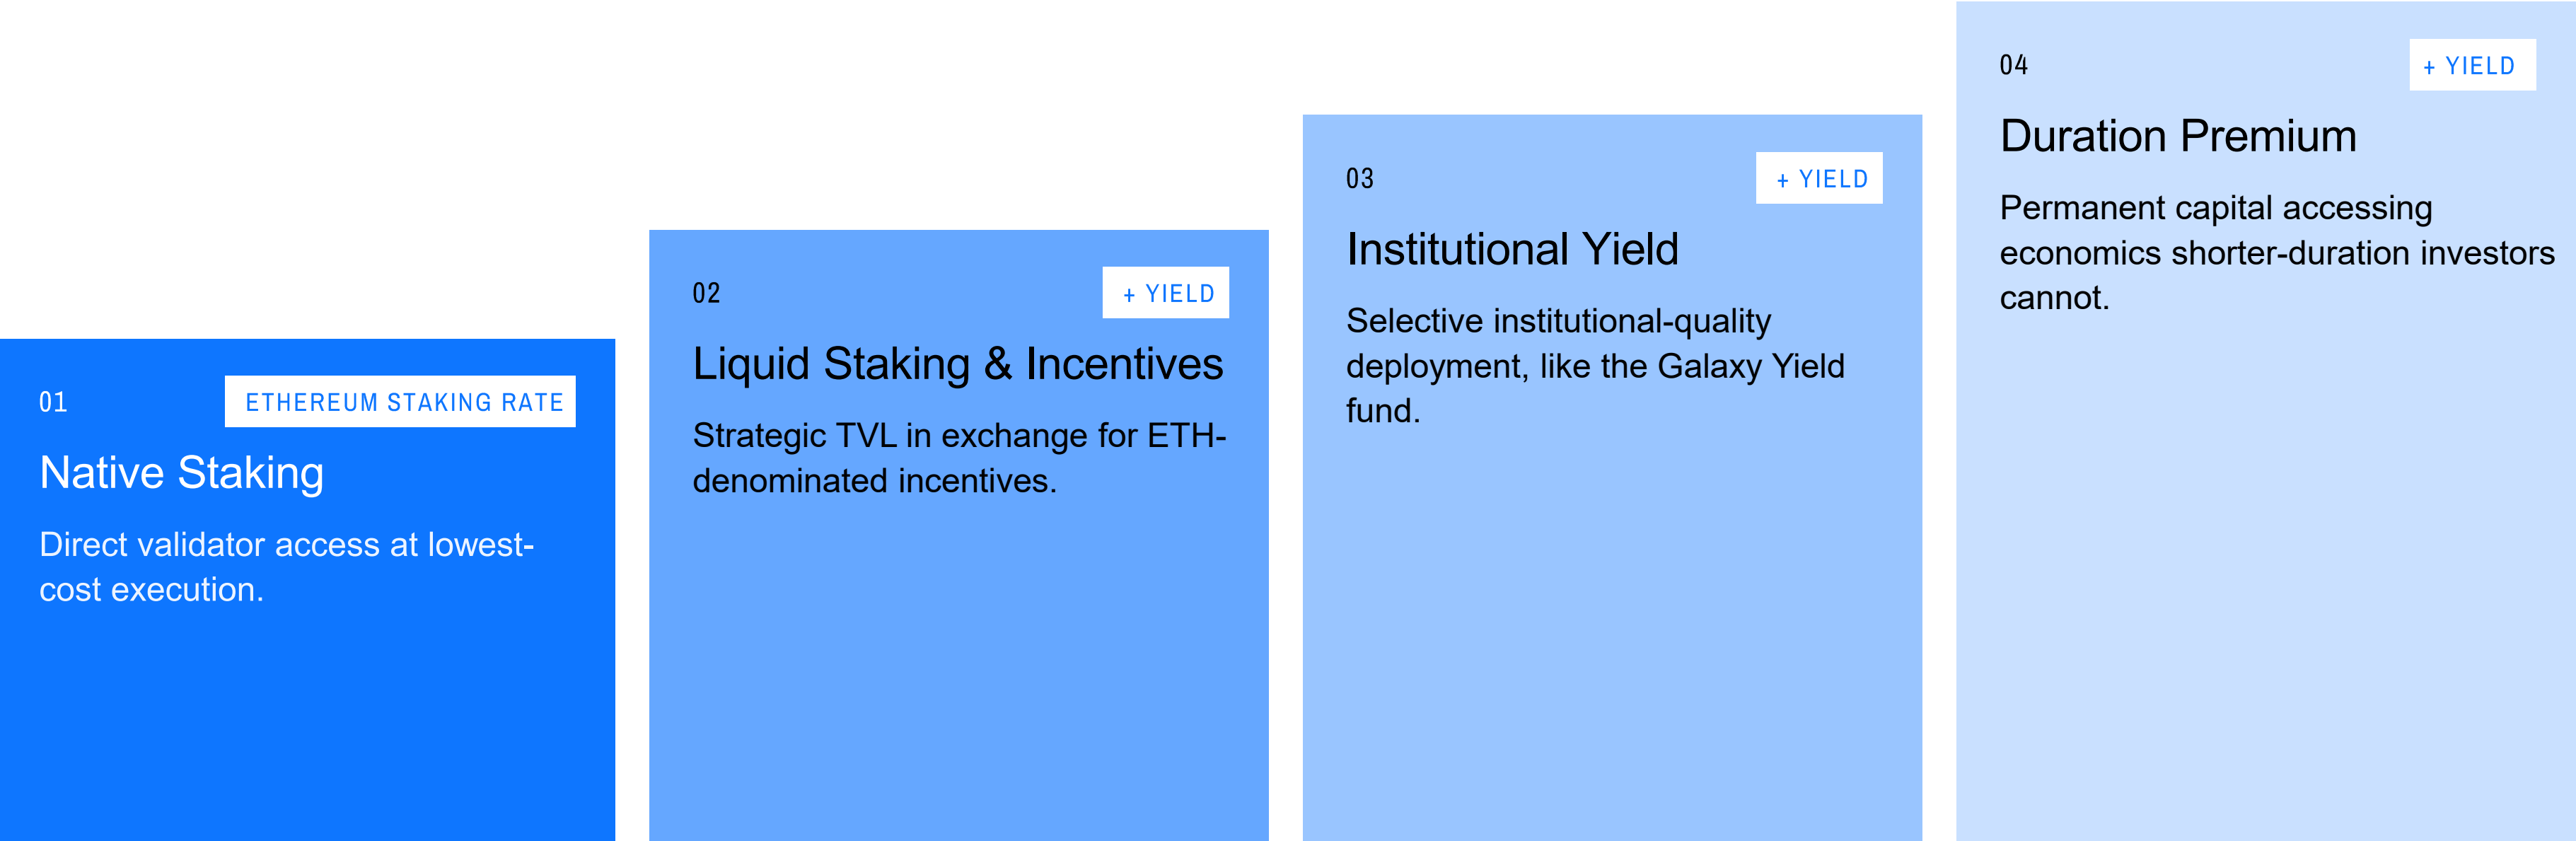

Sharplink uses issuance, structure, liquidity and repurchases to increase ETH concentration per share across market conditions.

LEVERS

ETH Productivity Beyond Staking

ETH generates native yield through staking. Each additional deployment targets incremental ETH-denominated returns within a distinct risk framework.

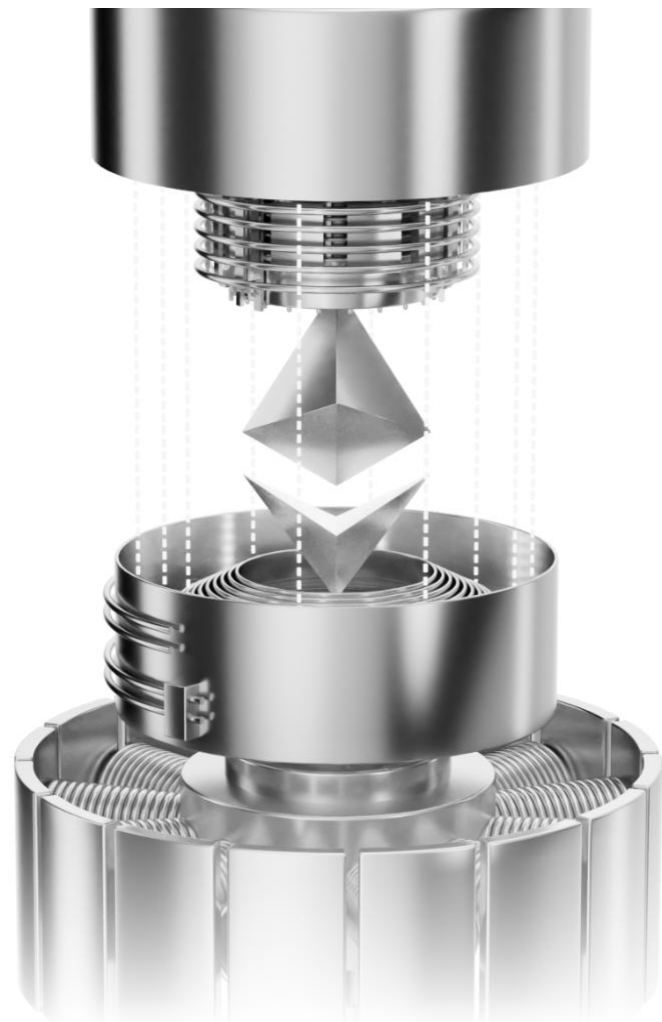

ABOVE THE ETHEREUM STAKING RATE →

Strengthening the Ethereum Ecosystem

Sharplink proactively supports opportunities that strengthen Ethereum — while pursuing returns beyond spot ETH exposure.

ETHEREUM TREASURY

THREE DELIBERATE EXTENSIONS

01 Deploying Ecosystem Capital

Strategic TVL, incentive partnerships and seeded vehicles generating ETH-denominated returns.

LINEA · ETHER.FI · EIGENLAYER · GALAXY

02 Strategic Investments

Ethereum go-to-market, confidential settlement and core protocol research.

SELECT INITIATIVES: ETHEREUM INSTITUTIONAL · ETHSYSTEMS · ETH LABS

03 Future Optionality

Leveraging strategic advantages for partnerships, investments, and M&A opportunities

Safe Harbor Statement

Statements in this presentation about future expectations, plans and prospects, as well as any other statements regarding matters that are not historical facts, may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, and these forward-looking statements are subject to various risks and uncertainties. Such statements include, but are not limited to, goals and expectations regarding the Company's strategy and potential partnerships; the Company's Ethereum treasury strategy and expected common stock per-share effects; and other statements accompanied by the words "intends," "may," "will," "plans," "expects," "anticipates," "projects," "predicts," "estimates," "aims," "believes," "hopes," "potential" or similar words, but the absence of these words does not mean that a statement is not forward looking. Actual results could differ materially from those described in these forward-looking statements due to certain factors, including without limitation, the potential use of the Company's ATM facility; the Company's ability to repurchase additional shares of its common stock under its stock repurchase program; the Company's ability to achieve and sustain profitable operations; volatility in the market price of ETH and its resulting impact on the Company's accounting and financial reporting; changes in government regulation of cryptocurrencies and online betting; changes in securities laws or other applicable regulations; fluctuations in customer demand and overall economic conditions; competitive pressures, including competing products, pricing, and sales cycles; the protection and enforcement of the Company's proprietary rights; and other risks and uncertainties described in the Company's Annual Report and other filings with the SEC. Under U.S. generally accepted accounting principles, entities are generally required to measure certain crypto assets at fair value, with changes reflected in net income each reporting period. Changes in the fair value of crypto assets could result in significant fluctuations to the balance sheet and income statement results. Additionally, for other certain types of crypto assets, the Company uses the historical costs less impairment model. This model may require the Company to record an associated impairment charge reflected in net income as a result of a decrease in the market price of the crypto assets below the cost value at which the Company's crypto assets are carried on its balance sheet. Any forward-looking statements contained in this presentation speak only as of the date hereof, and the Company does not undertake any responsibility to update the forward-looking statements in this presentation.

Disclaimer

This presentation has been prepared by Sharplink, Inc. ("Sharplink" or the "Company") solely for informational purposes to provide a general overview of the Company and its business. This presentation does not constitute an offer to sell or the solicitation of an offer to buy any securities of the Company, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful. Any offer of securities will be made only by means of a prospectus or other offering document filed with or furnished to the Securities and Exchange Commission (the "SEC") or otherwise made available in accordance with applicable law.

This presentation does not purport to be all-inclusive or to contain all of the information that may be relevant to an evaluation of the Company. It should be read together with the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and other filings with the SEC, which are available at www.sec.gov and on the Company's investor relations website. Those filings include a discussion of risk factors that could materially affect the Company's business, financial condition and results of operations presented on a US GAAP basis, including risks relating to the price volatility of ETH (including the volatility in the market price of ETH and its resulting impact on the Company's accounting and financial reporting), staking and other ETH deployment activities, custody, counterparty and smart-contract risk, and the evolving regulatory and legal treatment of digital assets.

Nothing in this presentation is, or should be construed as, a recommendation, promise or representation by the Company or any of its officers, directors, employees, agents, affiliates, representatives or advisors, or as legal, tax, accounting or investment advice.

Information as of Stated Dates. Unless otherwise indicated, information in this presentation is as of the date stated on the relevant slide or, if no date is stated, as of the date of this presentation. The Company undertakes no obligation to update this information, except as required by law.

Key Operating Metrics. This presentation includes certain operating metrics, including ETH holdings, ETH per share (ETH concentration) and staking rewards. These metrics are not calculated in accordance with U.S. GAAP and may be calculated differently from similarly titled metrics used by other companies. Definitions of these metrics and a description of how they are calculated are included in the Company's SEC filings.

Industry and Market Data. This presentation includes market, industry and third-party data, estimates and projections obtained from publicly available sources and third-party publications. The Company has not independently verified this information and makes no representation as to its accuracy or completeness. Industry projections are inherently uncertain, and any illustrative trajectories are not forecasts by the Company.

Trademarks. All trademarks, service marks, trade names and logos appearing in this presentation are the property of their respective owners. Their use does not imply any affiliation with, endorsement by, or relationship with those owners, except as expressly stated.
